Project 2 Report

- what you are most proud of about the project as well as what you could have done better with more time
  - I feel like adding animation could of been the biggest improvement so that it was better flowing.
- changes made to project in response to feedback provided by three critiques and instructor
  - From the feedback I decided to add more white space and changing to footer to have more information.
- resources/assets and what they were used for (frameworks, libraries, code snippets, plugins, templates, etc)
  - Mostly just using bootstrap but also adding a booking page from calendly.
- justification of some of the key design decisions
  - I really like the color scheme is is subtle but also unique I also like the layout of the services.
- ways that you customized the framework design
  - I wrote some custom code to change how some of the elements worked and looked.
- problems that you experienced along the way
  - One problem that I couldn't get solved was the navbar on small and tablet versions. I think it has something to do with bootstrap but I don't know I just copied the code from the site but I don't know why it didn't work.
